

SYED MUHAMMAD HAIDER ABBAS NAQVI

Python / AI Engineer — Backend and AI Systems

Multan, Pakistan — Open to Relocation to Lahore — +92 313 6314125

haidernaqvi7989@gmail.com — linkedin.com/in/syed-haider-abbas-naqvi — github.com/HaiderNaqvi-5

PROFILE

Python and AI-focused Software Engineer building backend systems, REST APIs, RAG pipelines, business applications, asynchronous workflows, and LLM-powered product features using FastAPI, PostgreSQL, Node.js, React, and modern AI tooling.

TECHNICAL SKILLS

Languages: Python, SQL, JavaScript, TypeScript, HTML, CSS

Backend & AI: FastAPI, Node.js, Express, PostgreSQL, SQLite, SQLAlchemy, Redis, Celery, WebSockets, REST APIs, RAG, pgvector, OpenAI APIs, Groq, LangChain, LangGraph

Frontend & Delivery: React, Vite, Next.js, Flutter, Docker, GitHub Actions, Git, Playwright, Pytest

EXPERIENCE

Cyberify

Aug 2026 – Sep 2026

AI Automation Intern — On-site

- Built document-ingestion, semantic-retrieval, and context-grounded AI workflows using FastAPI, PostgreSQL, pgvector, and OpenAI APIs.
- Contributed to T Rex, a team-built multi-channel AI outreach platform, owning the SMS Engine and its React/TypeScript frontend.

PROJECTS

GA Traders — POS & Inventory Management System

- Built a role-based POS and inventory platform using Node.js, Express, React/Vite, SQLite/PostgreSQL, and Flutter, covering products, stock, shops, orders, expenses, accounts, reconciliation, profitability, audit logs, and backup/restore.
- Implemented JWT/RBAC, transactional stock and cash restoration, controlled trade discounts, margin-aware reporting, secure invoices, and automated API/integration testing with **40 passing tests**.

T Rex — SMS Engine — github.com/hamzi2186/TeamProject

- Built two-way SMS conversation and campaign workflows using FastAPI, Celery, Redis-backed events, lead selection, bulk outreach, consent controls, and real-time delivery-state handling.

AidwiseAI (ScholarAI) — github.com/HaiderNaqvi-5/scholarai-platform

- Engineered PostgreSQL/pgvector scholarship matching and reduced the Docker image from 1.5GB to 250MB while eliminating repeated 420MB model initialization and hardening external ingestion against SSRF.

CampaignIQ — github.com/HaiderNaqvi-5/CampaignIQ

- Built a CRM-connected campaign workspace for grounded recipient-specific outreach, campaign review, contact/list workflows, message management, and scheduled follow-ups.

QSScope — github.com/HaiderNaqvi-5/QScope

- Built a local-first software quality platform for automated testing, dependency analysis, runtime/security checks, regression baselines, quality scoring, CycloneDX SBOM generation, and structured reports.

LEADERSHIP

President, Event Management Club

NFC-IET Multan

Led club operations and campus-event logistics, coordinating teams, planning, and execution.

EDUCATION

NFC-IET University

Graduated Aug 2026

Bachelor of Science in Computer Science, CGPA: 3.22/4.00

Multan, Pakistan

AWARDS & CERTIFICATIONS

Certificate of Appreciation, TechXhibit 2026 Final Year Project Competition, Air University Multan — Mobile App Development Certification
